EDUCATION

Kamala Institute of Technology and Science

B.Tech in Computer Science and Engineering

Huzurabad, Karimnagar

Aug. 2024 – Present

SR Junior College

MPC 91 Percentage

Nayeemnagar, Hanmakonda

Aug. 2022 – May 2024

SR High School

92 Percentage

Gopalpur, Hanmakonda

May 2022

INTERNSHIPS

Full Stack Developer

SPA Enterprises Info Services

July 2026 – Present

Hyderabad, India

- Developing scalable full-stack web applications using React, FastAPI, and MongoDB.
- Designing and implementing RESTful APIs for seamless communication between frontend and backend services.
- Building responsive user interfaces with React, HTML, CSS, and JavaScript to improve user experience.
- Managing MongoDB databases, including schema design, CRUD operations, and query optimization.
- Collaborating with the development team using Git and GitHub for version control and code reviews.
- Debugging, testing, and deploying applications while ensuring code quality and performance.

PROJECTS

Karen AI | *Python, FastAPI, LangChain, MongoDB, HTML, CSS*

2026

- Developed an AI-powered assistant capable of answering user queries using Retrieval-Augmented Generation (RAG).
- Built RESTful APIs with FastAPI and integrated MongoDB for efficient data management.
- Implemented document retrieval using LangChain, HuggingFace embeddings, and ChromaDB for context-aware responses.
- Designed an interactive chat interface for seamless user interaction and real-time AI responses.

School Management System Chatbot | *Python, MySQL, HTML, CSS, JavaScript, Groq API/LLM*

2026

- Built an AI-powered chatbot that enables users to interact with the School Management System using natural language.
- Implemented an LLM-based Text-to-SQL pipeline to automatically generate SQL queries from user requests.
- Developed a response-generation pipeline where a second LLM converts database outputs into conversational, human-friendly answers.
- Reduced the need for manual database queries by enabling intelligent and real-time access to school information.

Virtual Drawing Using Hand Gestures | *Python, OpenCV, MediaPipe, NumPy*

2026

- Developed a real-time virtual drawing application using OpenCV and MediaPipe for hand gesture recognition.
- Implemented gesture-based drawing with multiple brush colors, eraser mode, drawing toggle, and canvas clearing.
- Designed a modular Python architecture by separating hand tracking, gesture recognition, and drawing logic into reusable components.

TECHNICAL SKILLS

Programming Languages: Python, C, Java, SQL, JavaScript

Web Technologies: HTML, CSS, React.js, FastAPI

Databases: MySQL, MongoDB

AI/ML: LangChain, Retrieval-Augmented Generation (RAG), LLM Integration, Prompt Engineering, Hugging Face Embeddings, ChromaDB

Computer Vision: OpenCV, MediaPipe, NumPy

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

Coursework: Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems
